

TITLE OF RESEARCH: Neural activity, cognition and sleep

INVESTIGATORS: Ken Norman, Paul Scotti

PRINCIPAL INVESTIGATOR'S DEPARTMENT: Princeton Neuroscience Institute

You are being invited to take part in a research study. Before you decide to participate in this study, it is important that you understand why the research is being done and what it will involve. Please take the time to read the following information carefully. Please ask the researcher if there is anything that is not clear or if you need more information.

Purpose of the research:

This website contains an experiment being run by Princeton University researchers. We're interested in how images are categorized and remembered. To assess this, we're going to ask you to view a series of images and perform tasks on them.

I understand that:

1. I will be presented with a series of stimuli (e.g., image of scenes, faces and objects) on a computer screen and asked to perform simple tasks on the stimuli (e.g., categorization, memory judgments) by using the mouse or keyboard. Before each phase of the experiment, you will be given detailed instructions. The activities in the study carry no foreseeable risks. We will not have access to any of your personal information. All that we will record are your responses. All records from this study will be kept confidential.
2. My participation is voluntary, and I may withdraw my consent and discontinue participation in the project at any time. My refusal to participate will not result in any penalty.
3. I do not waive any legal rights or release Princeton University, its agents, or you from liability for negligence.

Who to contact with questions:
